

1 tady vybrat all keys

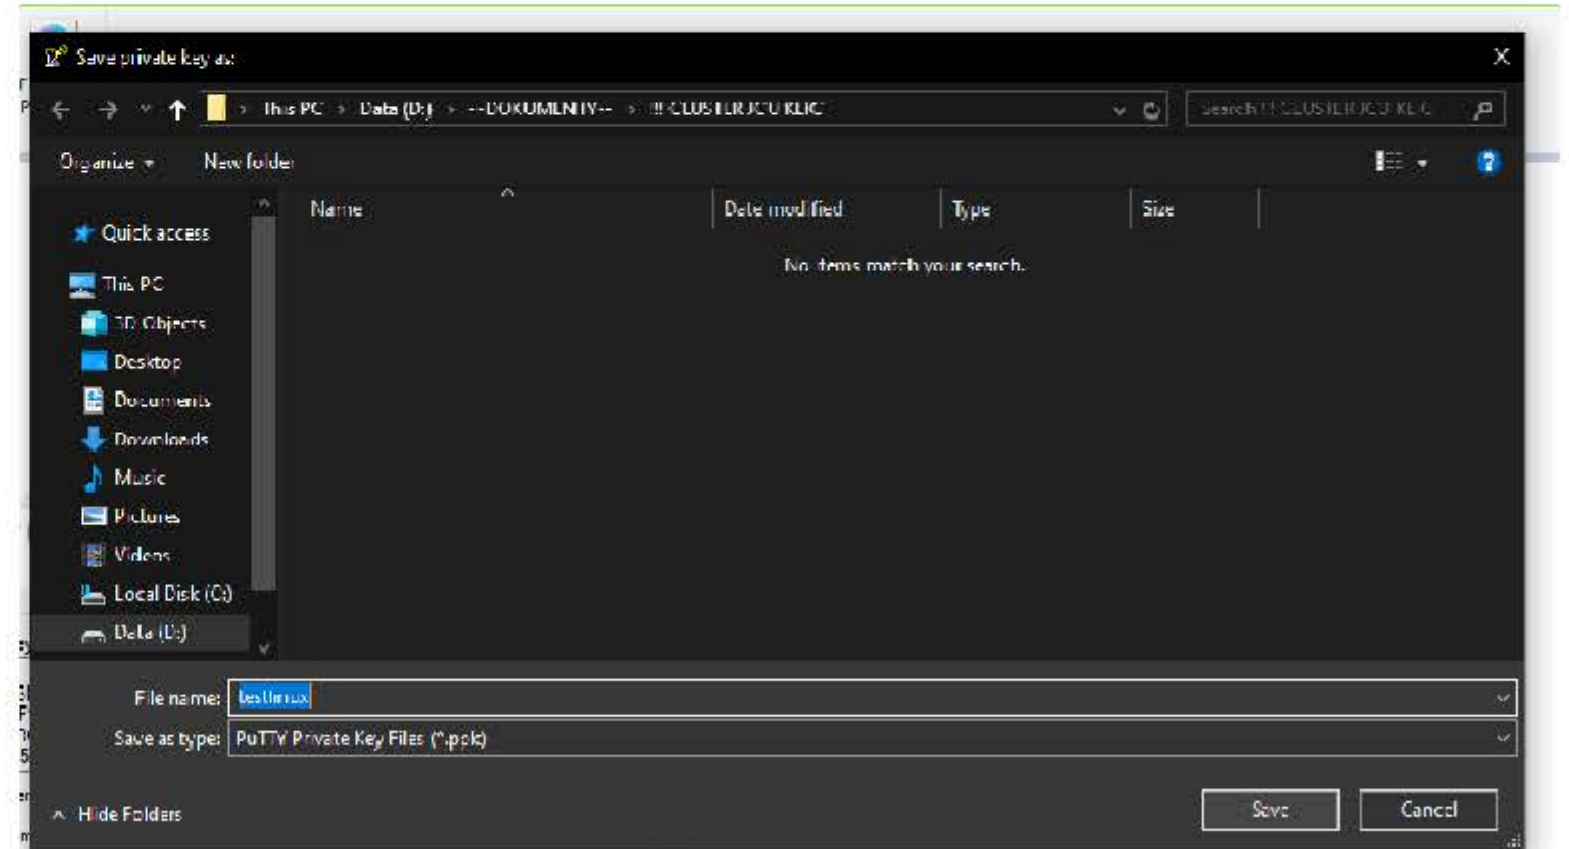

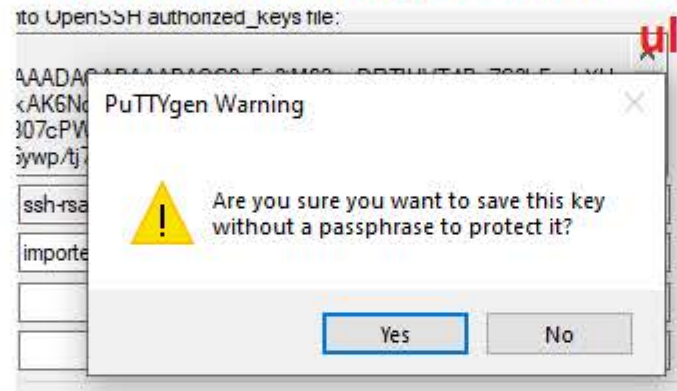

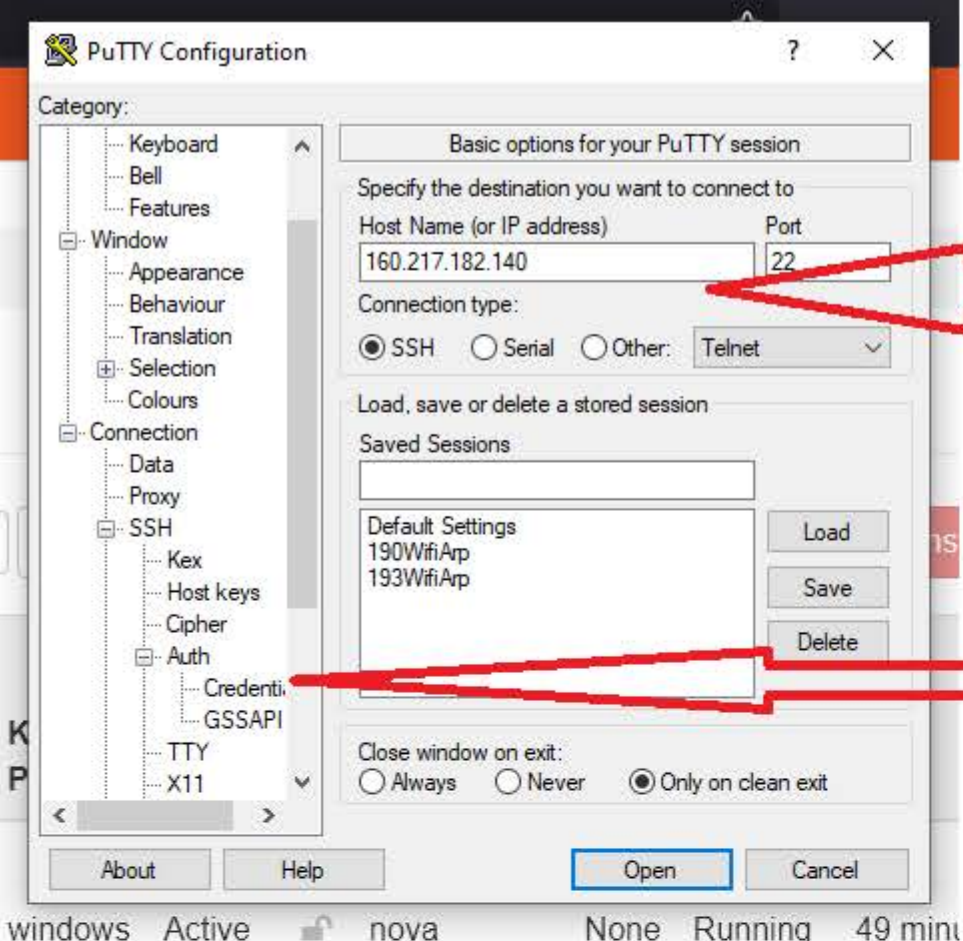

oznami vam ze naimportoval klice,
date ok

potom zase file, save private key

vyskoci na vas upozorneni date YES a vyskoci tabulka kde si muzete ulozit privatni klic ve formatu ppk

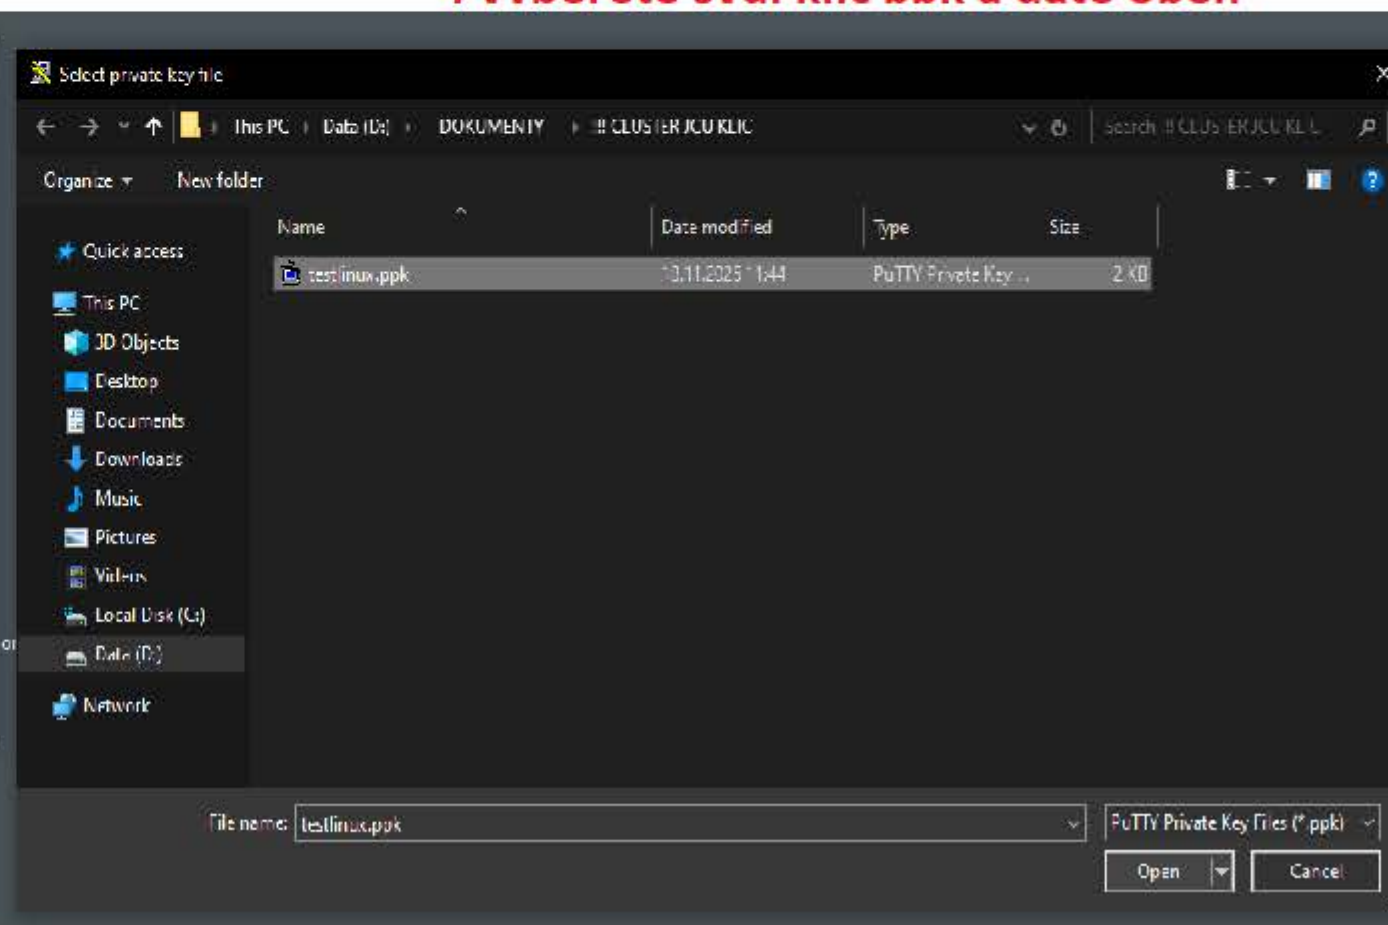

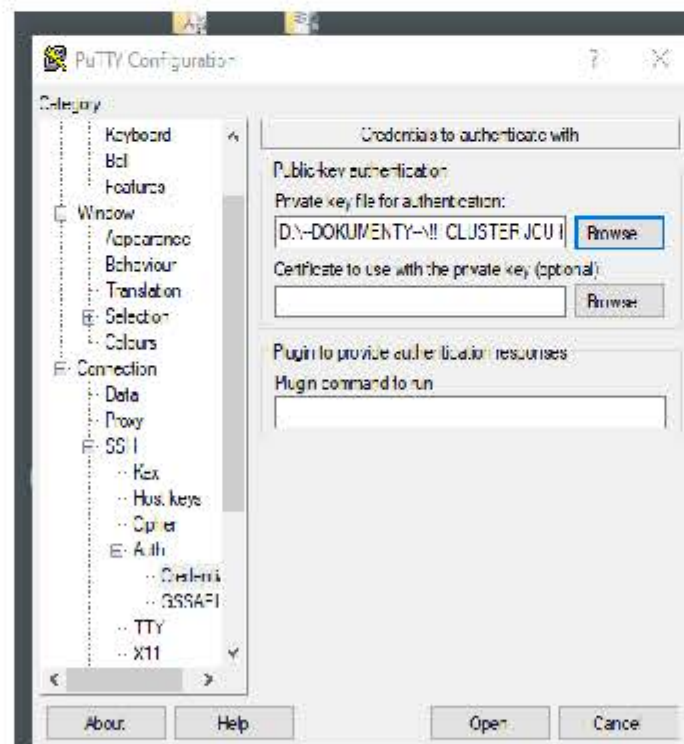

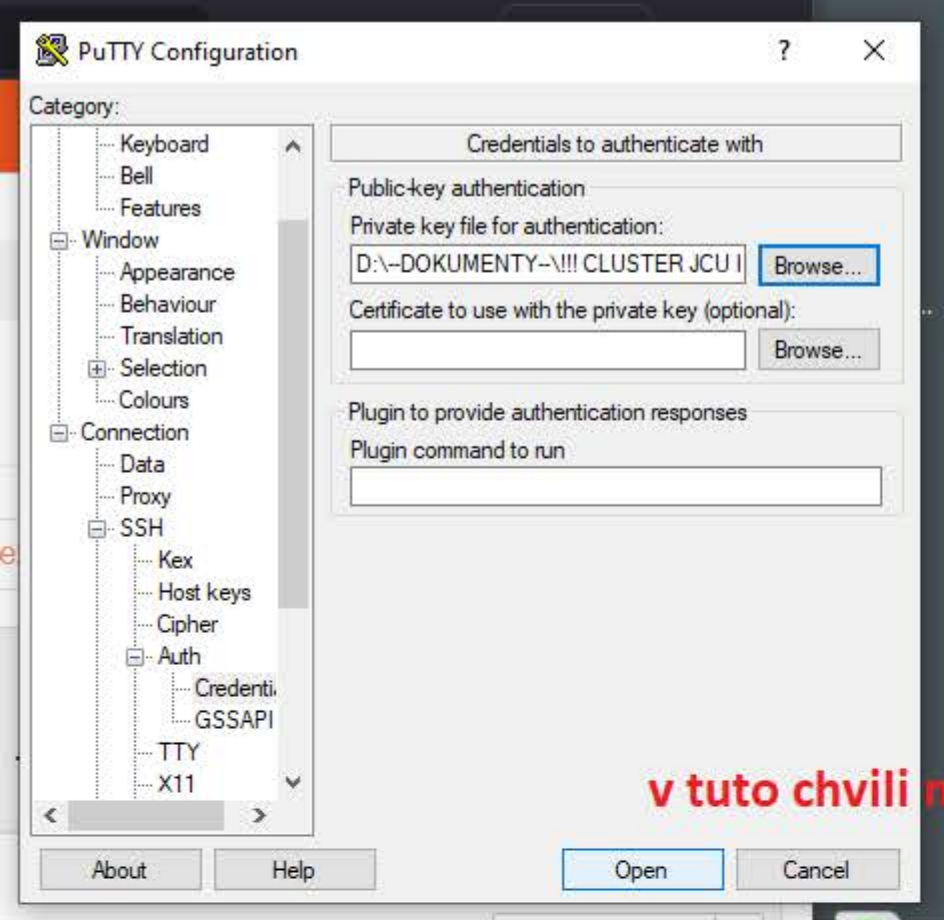

1 - pustime putty

2 vypneme ip adresu virtualu
kterou mate pridelenou

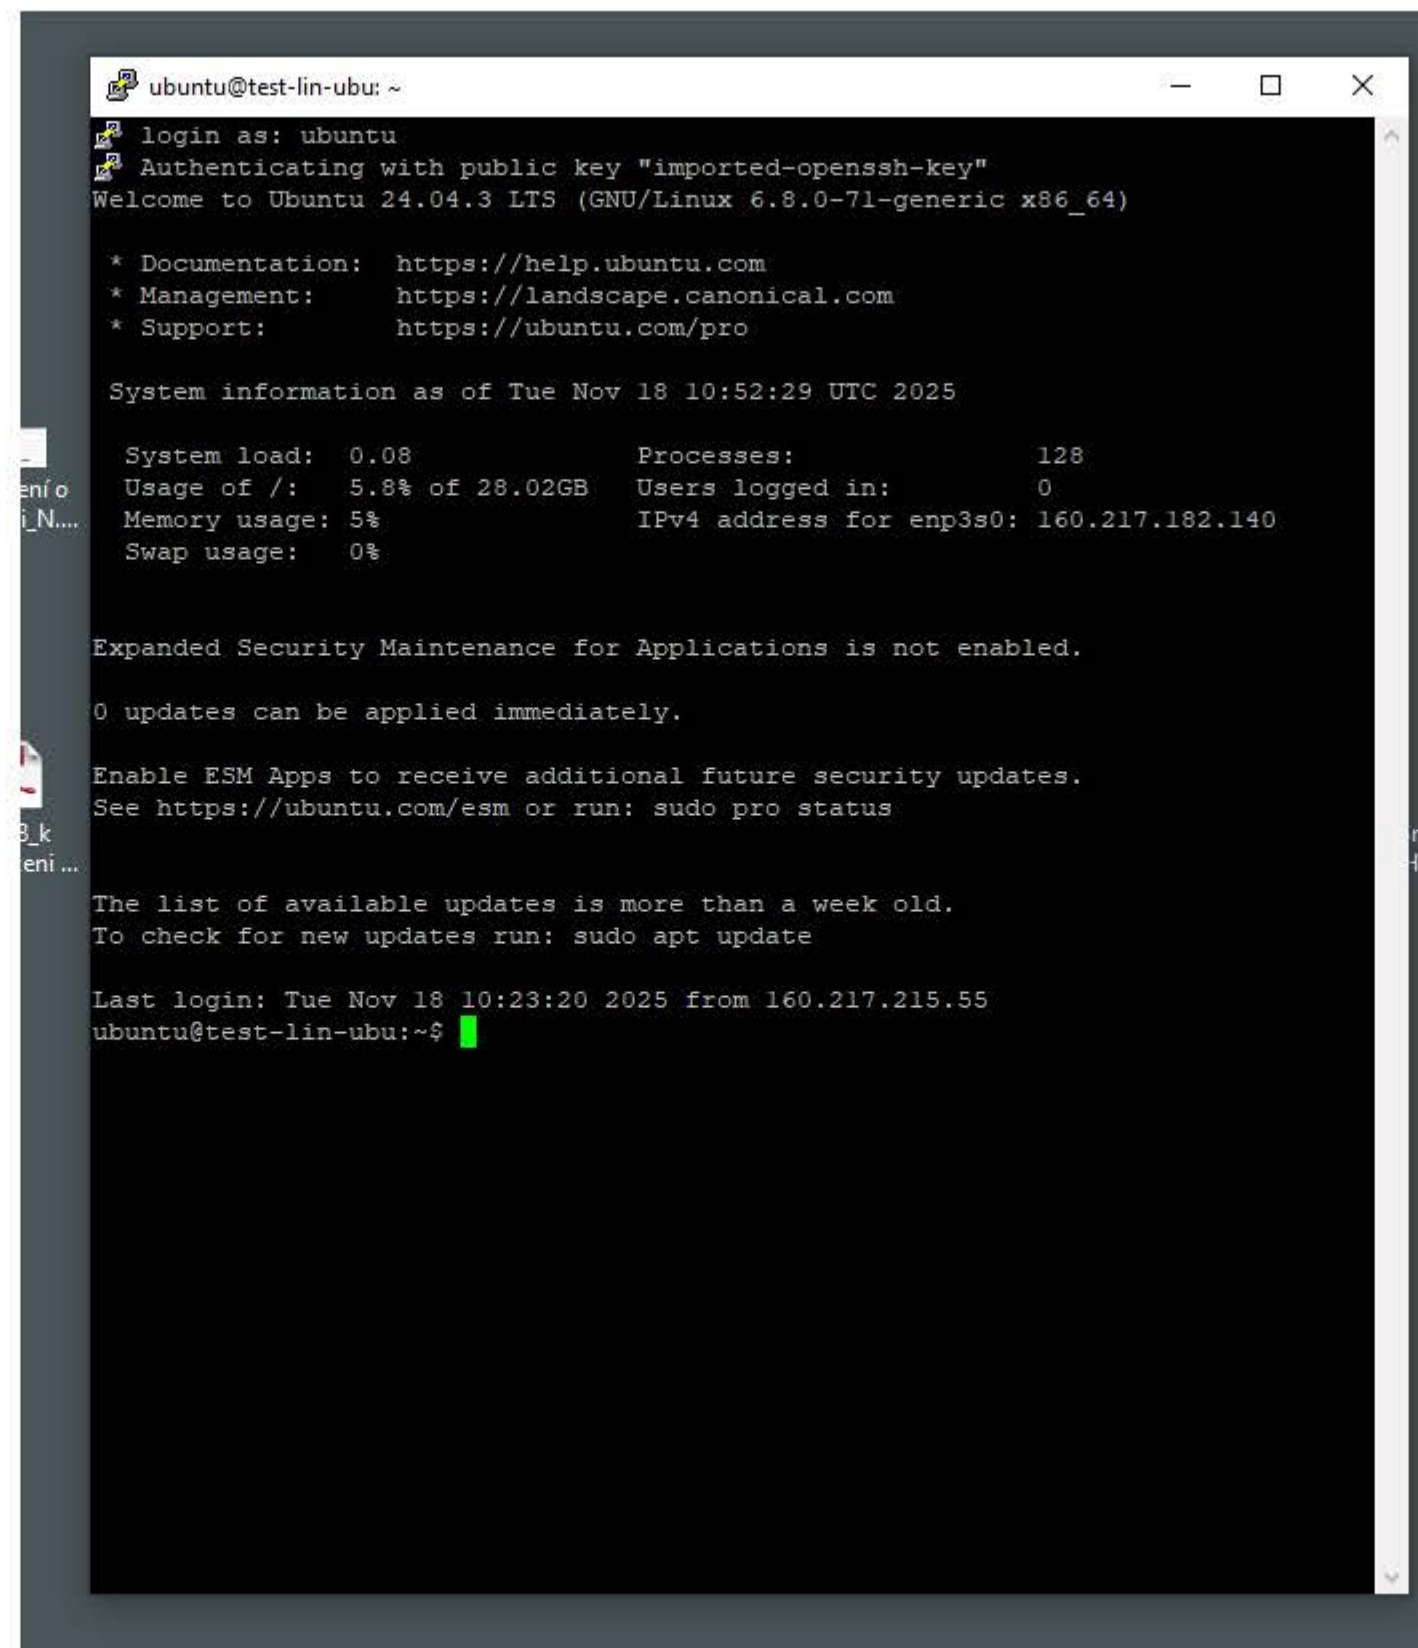

3 idem na zalozku connection
/SSH/Auth/credentials

4 vyberete svui klic ppk a date open

v tuto chvíli muzem dat open

otevere se vam konzole kde vyplnite uzivatele ubuntu a date enter, v tu chvíli pokud jste udelala vse spravne tak jste zalogovana jako uzivatel ubuntu s root opravenim. Nasledne muzete instalovat, zmenit si heslo, vytvorit dalsi uzivatele.
